

Values-based Change-Perspectives and Challenges

NRCVEE – IITD

Course coordinator – Shri Varun Vidyarthi

Credit – One credit course

In a world facing increasing challenges of climate change, continuing poverty and injustice, growing social tension and imbalances in daily living, the term leadership has acquired a new meaning.

A leader must not only understand how to deal with these complex issues in personal and professional life, but also enable others to do so.

This course enables the students to understand the multiple perspectives and challenges involved through real life experience sharing having the following details:

- Framework for Values Based Change: Climate Challenge, Poverty and Inequality
- Contributions to Perspectives on Development and Change across Civilizations
- Integral Path to Transformation
- The challenge of putting values into practice: Steps in Action
- Collective Reflection and Mentoring for Change
- Values Communication
